

DUO-SAFETY LADDER CORPORATION

Engineering Change Notice Effective 1/1/2003

Changes to Model 12' - 775A, 20' - 900A, 20' - 875A

This change is due to new MFG equipment

This change will effect the Aluminum 12' 775A & 20' 900A models by placing the first rung up from the bottom of the ladder to 14" from prong foot - old measurement was 15".

And the 20' 875A models by placing the first rung up from the bottom of the ladder to 13" from the prong foot - old measurement was 15"

Both of these changes have become necessary to allow the above models to be manufactured on our new production equipment.

If you require dimension sheets covering all the model modifications or require additional information, please contact our office.
