

# DUO-SAFETY LADDER CORPORATION

## Pulleys

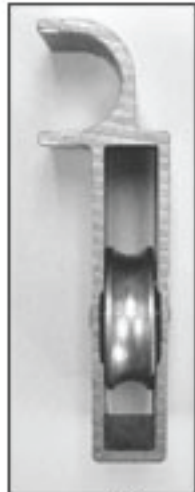

As of 10/03, Duo-Safety Ladder Corp. has updated ALL our pulleys with the ones pictured below.

All pulleys (shown below) are bolted to the rung of the section with 1/4" x 2" bolts and nut - thru a pulley clip. The pulley clip attaches the pulley to the rung. All new pulleys come complete with clip attached and come with the nuts & bolts. Installation of new pulleys are the same as old pulleys, minor adjustments may need to be made when lining up new clips with existing holes.
